

HEPA AIR FILTER - 500CFM AIR SCRUBBER

20Kg, 62cm × 66cm × 46cm

Perfect for cleaning air in mouldy environments and construction projects. Also used for removing odour for VOC's with carbon filter fitted.

TYPICAL USES:

- Mould and Indoor Air Cleanup- Remove dangerous mould and VOC's from the air in contaminated spaces and are a vital component of decontamination.
- Restoration and Construction- Used to filter out floating particles and dust, necessary for most remediation works under IICRC guidelines.
- Allergy, Dust and Soot Control- HEPA Air Scrubbers are perfect for helping make the air safer after fires; and can reduce allergy and dust reactions by removing particles from the air.
- Clean Rooms and Server rooms- Used to keep floating particles to a minimum and ensure airborne contaminants are captured safely without compromising room cleanliness.

Specifications
